The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy economy.

New energy storage system designs offer safer and longer operational lifespans, as well as allow customers to install large battery systems that provide emergency power to critical functions when ...

NLR researchers are designing transformative energy storage solutions with the flexibility to respond to changing conditions, emergencies, and growing energy demands--ensuring energy is ...

The Office of Electricity announced \$5 million each to 3 grid-scale energy storage projects that support critical facilities and infrastructure in a power outage or other emergency.

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions.

-- The Bureau of Land Management today announced that construction of the Crimson Energy Storage Project, a 350-megawatt battery storage system in eastern Riverside County, is now ...

The policies of the previous administration have driven our Nation into a national emergency, where a precariously inadequate and intermittent energy supply, and an increasingly unreliable grid, require ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS installation ...

Through the collection of best practices and understanding the benefit-cost analysis (BCA) of these projects, stakeholders will have a greater sense of how energy efficiency and renewable energy with ...
