When will storage tax credits become technology neutral?

The House got its way through the end of 2024, and the tax credits moved to new tax code sections and became technology neutral starting on January 1, 2025. Both houses wanted to allow investment tax credits -- but not PTCs -- on storage projects.

What are co-located solar and storage projects?

Co-located solar and storage projects usually feature a mix of the fixed and variable revenue sources, which continue to evolve as changes occur in regional energy regulations and markets.

How do battery storage project developers make money?

Battery storage project developers can enter into contracts with utilities and other parties to offer these services in addition to contracts for the sale of electricity (see Battery Storage Revenue Models: Fixed Price Contracts and Battery Storage Revenue Models: Variable Revenue Sources).

What is a battery storage contract?

Battery storage contracts (whether for standalone storage projects or solar or wind projects paired with storage) typically include a fixed-price payment for resource adequacy attributes. Retains operational control of the battery storage facility and the right to collect and retain revenue from sales of electricity discharged from the battery.

New bill maintains grid storage incentives but cuts \$7,500 EV credit within 180 days, threatening automakers' plans. Battery industry faces split future: grid storage benefits while EV ...

This Practice Note discusses changes to financing structures for battery storage projects after the enactment of the Inflation Reduction Act. This Note also discusses the fixed and variable revenue ...

While lenders may need to undertake additional diligence before financing an energy storage project, the project finance market for energy storage has and is continuing to grow ...

Energy storage and all other types of power projects (i.e., other than solar and wind) have until the end of 2033 to start construction to qualify for technology-neutral tax credits at the full rate.

The financing phase of energy storage projects has passed

Battery energy storage projects face distinct technical challenges that complicate their development and financing. A key concern is the degradation of battery systems over time.

The U.S. energy storage sector is expected to continue expanding after the enactment of the FY2025 Budget Act, which secures Investment Tax Credit (ITC) eligibility for storage projects ...

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic content ...

They weren't ignored but, in many portfolios, battery energy storage systems (BESS) were something tied into larger solar or wind developments. That is changing, and quickly, after the ...

LPO can help reduce these barriers by financing early deployments of energy storage technologies and associated supply chains, proving to private lenders that energy storage systems are bankable and ...

US energy storage projects that begin construction by the end of 2033 will remain eligible for investment tax credit (ITC) incentives. During last Friday's Independence Day national holiday (4 ...
