What is an IP66 enclosure?

Made from stainless steel and certified to both Atex and IECEx standards, these enclosures deliver IP66 protection, making them ideal for zones 1, 2, 21, and 22 and capable of withstanding extreme conditions.

What is a tunnel application power box?

Based on various tunnel parameter signals, the control system enables remote dimming and switching as well as comprehensive diagnostics of all networked luminaires. The TAP (Tunnel Application Power) boxes from Phoenix Contact have been specially developed for safe, fireproof, and simple power distribution in tunnels.

What is the ATEX cabinet cooler IP67?

The Atex cabinet cooler IP67 is a thermoelectric cooler for applications in potentially explosive... Do you have a special project? rating 4.6 out of 5.

Suitable for IT and telecommunication solutions in outdoor conditions; protection against dust, accidental contact and water. Manufactured from DX51D+ZN275 material.

IP66 protects against dust, water and corrosion. Manufactured from DX51D+ZN275 material. Provides IP66 protection class by preventing dust and water ingress thanks to solid welded metal ...

Made from stainless steel and certified to both Atex and IECEx standards, these enclosures deliver IP66 protection, making them ideal for zones 1, 2, 21, and 22 and capable of ...

Overview NITROTEL Thanks to their welded, mono-block structure used for all IT solutions, they are stronger structures than demountable structures. They come in IP66 NEMA-4X protection class with ...

Enhance driver safety and traffic flow with Fanxstar's tunnel lighting solutions. Engineered to withstand constant vibration, exhaust fumes, and tunnel washing, delivering reliable flicker-free illumination.

Made from stainless steel and certified to both Atex and IECEx standards, these enclosures deliver IP66 protection, making them ideal for zones 1, 2, 21, and 22 and capable of withstanding extreme ...

From designing the photometrical study, integrating a performing control system, to compliance checks to system set-up, we will coordinate every aspect of your lighting project.

Implementing IP66 weatherproof telephone systems significantly enhances tunnel safety. These robust systems ensure operational reliability and emergency preparedness in challenging ...

Our ready-to-install control cabinet solutions allow you to configure your entire lighting system quickly and easily. The preprogrammed solutions can be integrated flexibly into your existing automation ...

We offer advice from the very foundation of an enquiry: we acquaint ourselves with your circumstances and work with you to produce a quality, cost-effective individualised solution for your project ...
