Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

On October 14, 2022, the government approved the Concept of Smart Grid Implementation in Ukraine Until 2035. The document, developed with the support of the World Bank, ...

By promoting solar energy alongside Battery Energy Storage Systems (BESS) and smart grid integration, the initiative aims to create a stable and efficient energy architecture.

Amid Russia's continued attacks on Ukraine's energy infrastructure, solar power has the potential to fill a vital energy gap, contributing to the creation of a more reliable, decentralised and ...

Policy options to accelerate distributed solar PV in Ukraine - Analysis and key findings. A report by the International Energy Agency.

Discover how solar and batteries are transforming Ukraine's energy landscape and improve the country's resilience and energy independence.

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

Ukraine's largest private energy company DTEK and British clean energy group Octopus Energy have launched a program to install rooftop solar panels and battery storage systems at ...

Ukraine is making a "strategic shift" toward distributed energy resources. In the two and a half years since Russia invaded Ukraine, Ukraine's energy system has been a regular target, with ...

In December, the International Energy Agency published a report covering three strategies for accelerating

Ukraine smart solar system

deployment of distributed solar-plus-BESS in Ukraine.
