-----  
How do I choose a home solar system?

Some of the factors to consider when choosing a Home Solar System are: Understanding your household's energy consumption patterns is crucial when choosing a home solar system. The system's size, cost, and number of panels will depend on the amount of energy you need to generate.

What are the components of a home solar power system?

Solar panels, an inverter, a charge controller, and a battery are the main components of a home solar power system. By absorbing sunlight, solar panels provide DC electricity that may be used immediately. After the DC power is fed into the inverter, it is transformed into the more common AC power for residential usage.

What are the different types of home solar systems?

The various types of home solar systems are: A grid-tied solar system, also known as a grid-connected solar system, is connected to the electrical grid and provides power to your home while also sending excess power back to the grid.
