Why should you choose a solar power plant in Vienna?

Our solar power plant in Vienna's Liesing provides the optimum environment in the city for species requiring protection. Our citizen solar power plants allow people to financially participate in PV systems, benefiting from a secure investment and favourable tariffs.

What is Vienna's first solar roof?

Vienna's first solar roof is made with special bifacial glass-glass solar modules which generate power from the top and the bottom. The city development area VIERTEL ZWEI is home to Vienna's first energy community allowing residents to trade self-generated solar power. Wien Energie offers district cooling on hot days.

What is Wien energy?

Wien Energie gives citizens the opportunity to participate in the expansion of charging stations by offering attractive investment packages. Wien Energie simulated the mobility future collecting insights into the requirements for an expansion of the charging network in houses.

As Vienna accelerates its renewable energy transition, energy storage projects have become critical infrastructure. This article explores the latest bidding strategies, technical requirements, and market ...

It is built specifically for outdoor installation and integrates advanced LiFePO4 battery technology, a high-level battery management system, and secure weatherproof housing, making it ideal for ...

Discover how cutting-edge battery systems are reshaping energy management across industries - and why Vienna's innovations matter for your business.

Slovenia-based NGEN put Austria's largest battery energy storage system into operation. It installed it in record time - just seven months.

Our solar power plant in Vienna's Liesing provides the optimum environment in the city for species requiring protection. Our citizen solar power plants allow people to financially participate in PV ...

Vienna builds 7mwh of batteries for solar-powered communication cabinets

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage ...

In this article, I explore the application of LiFePO4 batteries in off-grid solar systems for communication base stations, comparing their characteristics with lead-acid batteries, ...

On one of our construction sites at Vienna's Nordbahnhof, we recently launched a pilot project to supply the construction site cabins with green energy through a photovoltaic system - with encouraging ...

Summary: Vienna is emerging as a leader in photovoltaic energy storage projects, combining solar power with advanced battery systems to build a resilient and eco-friendly energy grid.

In addition to being the perfect combination of density and safety, it is a flexible format to respond to future market needs with optimized cell and pack variants - like for high power.
