What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa), the rest of the generation capacity is in private hands.

How much electricity does El Salvador produce a year?

Gross electricity generation in 2006 was 5,195 GWh, of which 40% came from traditional thermal sources, 38% from hydroelectricity, 20% from geothermal sources, and 2% from biomass. In 2006, total electricity sold in El Salvador was 4,794 GWh, which corresponds to 702kWh annual per capita consumption.

Is there a solar map of El Salvador?

A solar map of the country is also under development. Currently, there are two geothermal facilities in operation in El Salvador, the 95 MW Ahuachapan, and the 66 MW Berlin plant. Majority state-owned power company LaGeo, formerly Gesal, operates the two plants.

How many hydroelectric plants are there in El Salvador?

The public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa) owns and operates 97% of the capacity. The four hydroelectric plants in El Salvador are: 5 de Noviembre (81.4 MW), Guajoyo (15MW), Cerr#243;n Grande (135 MW), and 15 de Septiembre (156.3 MW), all of them on the Lempa River.

A years-long energy project in El Salvador recently reached a milestone, as technology company Wärtsilä in November announced the installation and successful operation of a ...
