As Europe accelerates its transition to renewable energy, the Riga energy storage project has emerged as a pivotal initiative. This large-scale battery storage system is designed to stabilize Latvia's power ...

Through smart use of large-scale energy storage, parties can be connected more quickly at lower social costs, using more sustainable energy and allowing fossil fuel power stations to be closed more quickly.

In Latvia, IGC is building a presence in energy storage and working with local partners to support the development of grid-scale BESS aligned with long-term system needs.

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, featuring five units of the company's HNESS 230-L ...

There are currently a total of 23 operational biogas power stations and seven biomass power stations in Latvia. Most of them are cogeneration stations.

Summary: Riga's cutting-edge energy storage power plant is transforming how the Baltic region manages renewable energy. This article explores its technical specs, real-world applications, and ...

With features like high energy density, fast charging, and long cycle life, these systems provide a reliable and efficient solution for energy storage, enabling you to achieve greater energy independence.

Looking to 2030, Riga plans to deploy liquid air storage - essentially bottling winter cold for summer AC use. It's like making snowballs in July, but for real energy savings.

Over 5,000 households now participate in Riga's virtual power plant program. Their aggregated 38MWh capacity provides crucial grid services during emergencies while earning participants EUR120-EUR600 ...
