---

Kingston Energy Complex is an operating power station of at least 65-megawatts (MW) in Roane, Tennessee, United States with multiple units, some of which are not currently operating.

Kingston Fossil Plant will become a state-of-the-art energy complex that includes natural gas, solar energy, and battery storage -- the first of its kind for TVA.

The gas plant will be part of a new energy complex. TVA plans to add 100 megawatts of battery storage and up to 4 megawatts of solar power to the site later on.

TVA's 1.3-GW Kingston Fossil Plant, slated for retirement in 2027, is located on the Clinch River arm of Watts Bar Reservoir near Kingston, Tennessee, on approximately 800 acres.

Once completed, the state-of-the-art energy complex will deliver 750 megawatts of combined cycle natural gas, 800 megawatts of flex-fuel aeroderivative turbines, 100 megawatts of ...

Construction continues at the Kingston Energy Complex in East Tennessee, set to generate power for 900,000 homes using natural gas, solar, and flexible fuel turbines. The project ...

The Tennessee Valley Authority will retire the Kingston coal-fired plant and replace it with a 1,500-megawatt natural gas plant, along with some solar panels and battery storage, by the end of...

The complex is a massive natural gas power plant that will replace the existing Kingston Coal Plant in Harriman, about 40 miles west of Knoxville.

The Tennessee Valley Authority is making progress on its transformation of the aging Kingston Fossil Plant, a new facility that will include natural gas, solar and battery storage to balance...
