What is a pytes V series LFP battery?

Thank you for purchasing our Pytes V series LFP battery for home energy storage system. Our V series battery pack is designed to provide safe, high-performance energy storage solutions for a variety of applications.

Can a battery pack be used as a building block?

The compact and easy-to-install battery pack can be used as a basic building block in an energy storage system by connecting in parallel. It is widely used in residential, small commercial, and industrial energy storage systems, as well as telecommunication stations.

Can I use a pytes V series battery pack in a medical application?

The V series battery pack is not intended for use in medical or aviation-related applications, and should only be used for its intended purpose as described in this manual. Improper use of the battery pack will void the warranty of the product, and Pytes cannot be held responsible for any damage caused by improper or incorrect use of the product.

What are the operating environment requirements for a battery?

Battery operating environment requirements:	Operating Temperature:
-10~50°C (14~122°F)	Relative Humidity: 20%-80%, no condensation
Altitude: <4000m	
Site environment requirements: Keep away from heat source, avoid direct sunlight, no corrosive gas, no explosive gas, no insulating gas, no insulating conductive dust.	

Note: The battery must be placed in a locked cabinet or room, and a 5cm cooling gap is reserved when installing the battery, and the battery cabinet should have a load capacity of more than 100kg

The battery room should be designed in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations.
