How many power plants are in Guatemala?

Guatemala has 69 utility-scale power plants in operation, with a total capacity of 3421.5 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth

When will Guatemala's first natural gas power plant be completed?

The project, slated for completion in 2025, marks a significant milestone in Guatemala's energy landscape as it introduces the country's first mid-scale power plant operating on natural gas.

Does Guatemala have a natural gas power plant?

In a pioneering move for the region, the power plant will utilize locally produced natural gas. This departure from imported coal, diesel, or heavy fuel oil commonly used in Guatemala underscores the commitment to environmental sustainability.

How much energy does Guatemala use?

For example; out of possible 5000 MW hydroelectric power potential, Guatemala uses only 853 MW (17.06%), and of 1000 MW potential of geothermal energy, the country uses just 49.2 MW (4.92%). Guatemala's total energy production reached approximately 9.6 Mtoe by the year 2016.

Energy Overview of Guatemala CAUTION: The summaries provided below are based on the data in GEO which may be incomplete.

List of power plants in Guatemala from OpenStreetMap

In terms of energy, Guatemala comes as the second largest Central American power market, with a total generating capacity of 4.2 GW [4].

The project, involving the supply of 5 Bergen B35:40V20AG2 gensets, is slated for completion in 2025, marks a significant milestone in Guatemala's energy landscape as it introduces ...

Data and information about power plants in Guatemala plotted on an interactive map.

What is the guatemala power plant

The project, slated for completion in 2025, marks a significant milestone in Guatemala's energy landscape as it introduces the country's first mid-scale power plant operating on natural gas.

This article explores the latest developments in Guatemala power plants, analyzes key challenges, and reveals how innovative solutions are shaping Central America's energy future.

Guatemala has 69 power plants totalling 2,724 MW and 2,622 km of power lines mapped on OpenStreetMap. If multiple sources are listed for a power plant, only the first source is used in this ...

As of 2020, Guatemala had 4110 MW of installed electrical capacity, based primarily on hydro power (38.38%), fossil fuels (30.36%), and biomass (25.20%). Other renewable sources represented a ...

IPS Guatemala has a generating capacity of 460 MW through our assets across Puerto Quetzal and Esquintla. Discover the plants and barges that power the people of Guatemala every day.
