What is a mobile concrete mixing plant?

Mobile concrete batching plants are more flexible and easier to install. The mobile concrete mixing plant consists of the same units as the stationary concrete mixing plant, which are fixed on a chassis with shafts and wheels. If you have special requirements, we can customize a mobile concrete batching plant for you to meet your specifications.

What are the different types of portable concrete plants?

At present, portable concrete plants are mainly divided into two types: traction type and trailer type. They usually use a two-stage process and cumulative measurement method.

What is the difference between stationary and mobile concrete mixing plants?

Stationary concrete batching plants have slower transportation efficiency and longer installation time. Mobile concrete batching plants are more flexible and easier to install. The mobile concrete mixing plant consists of the same units as the stationary concrete mixing plant, which are fixed on a chassis with shafts and wheels.

What is a mobile concrete batching plant?

The mobile concrete batching plant is designed to be movable, making it especially suitable for temporary construction projects or sites. Stationary concrete batching plants have slower transportation efficiency and longer installation time. Mobile concrete batching plants are more flexible and easier to install.
