How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

What is Bess & how does it work in the Philippines?

For commercial and industrial companies in the Philippines, BESS provides an opportunity to take control of their energy usage. These systems consist of high-capacity lithium-ion batteries and sophisticated energy management software.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.

How does the complexity of integrating Bess affect installation costs?

The complexity of integrating BESS into your existing infrastructure can affect installation costs. Energy storage systems involve the integration of many components including batteries, fire detection equipment, controllers, inverters, and more - all packed inside an enclosure.

Discover how Prostech's reliable solutions for BESS are being integrated to help with bonding and protecting the system while effectively managing thermal requirements.

The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the Philippine ...

Discover how battery energy storage systems (BESS) are reshaping energy reliability and renewable integration across the Philippines.

The battery energy storage system (BESS) market in the Philippines encounters several hurdles. One primary
